

CMSI 402 Project Status Sheet

Fall 2018

Name: Megan Karbowski

Date: 4/2

Project: Ancur

Period Covered: week 3/19 - 4/2

Accomplishments since last report:

- Changed API requests to match Stampery's new methods
- Tested stamp creation
- Tested receipt proving and retrieval
- Implemented new styling for returning stamped document's data
- Display Bitcoin receipt data when a stamped document's receipt is proved
- Decided to stick with Bootstrap instead of Material

Scheduled tasks to be done by next report:

- Implement styling for proving receipts and receipt viewing
- Continue implementing returning the receipts related to a stamped document's id when proving receipts - show both Bitcoin and Ethereum receipts
- Display stamp and receipt results in a dropdown
- Change hashing function used when stamping a document
- Implement routing
- Develop an informational about page
- Provide informational popovers explaining how to use the application

Noteworthy risks, concerns, or problems:

- Changing the hashing function could result in returning duplicate hashes
